Art Unit: 3682

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 12, 13, and 15-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 12, it is not understood how there can be relative rotation between the shaft and the sleeve, when claim 11 requires the side of the hydrodynamic bearing means to be fixed to the sleeve, with claim 12 defining the hydrodynamic bearing means as the shaft and thrust plate. This combination requires the shaft and thrust plate to be fixed to the sleeve, which would render the device inoperable. The hydrodynamic bearing means of claim 11 should be more fully defined to overcome this rejection. With respect to claim 13, it is unclear how the counterplate cup has "sleeves that are fitted on a reduced diameter section of the sleeve." Claim 15 lacks a proper antecedent for "the cup side". Claim 16 lacks a proper antecedent for "the thrust plate", "the gap", and "the two surfaces". Claim 17 is indefinite as it is not understood how the subject matter further limits the scope of claim 1.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 11, and 12 are rejected under 35 U.S.C. 102(a) as being anticipated by Nakazeki et al.

Art Unit: 3682

Note Figure 1 showing a spindle motor for use in a disc drive (column 5, lines 13-17) comprising a shaft (2) supporting a sleeve (7) and a hub (3) for relative rotation, the hub supporting one or more discs (D) for rotation, and hydrodynamic bearing means (6) for supporting the hub for rotation, and wherein a region of the side of the hydrodynamic bearing means is fixed to an outer surface of the sleeve (7) by adhesive (column 6, line 62).

Claims 2-5 are allowed.

Claims 13, 15, and 16 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Applicant's arguments filed January 18, 2005 have been fully considered but they are not persuasive. The objection to the Drawing is withdrawn in view of the replacement sheets. The objection to the specification is withdrawn in view of Applicant's amendments to the specification.

With respect to the rejection on Nakazaki, Applicant states that "Nowhere does the Nakazaki reference disclose each and every element of the claimed invention". Applicant has amended claim 1 and argues that Nakazaki does not teach "a counterplate cup having a base defining one surface of a second bearing thrust and defining a gap therewith, and having upraised sides tightly fitted over an outer surface of the sleeve, and wherein a region of the side of the cup is fixed to an outer surface of the sleeve by adhesive or epoxy." Nakazaki does however clearly anticipate this language with the bearing shown in Figure 1 having counterplate cup 6 having base 13 and upraised sides, with the sleeve 7 adhered to the housing. See column 6, lines 61-64.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
